CLI vs. GUI

3

- ▶ A **GUI** (Graphic User Interface) is a graphical representation in which the users can interact with software or devices through graphical icons.
- ▶ A **CLI** (Command Line Interface) is a console or text based representation in which the user types the commands to operate the software or devices.

GUI

CLI

Future Envision

01:11 06:27

1. GUI is better than CLI → GUI is more user friendly than CLI
2. CLI takes less much resources than GUI
