1) 'time' and 'date' to see the time and date respectively, we can also change it

```
C:\Windows\system32\cmd.exe

E:\Computer  Languages\MS DOS>time
The current time is: 19:49:00.82
Enter the new time:

E:\Computer  Languages\MS DOS>date
The current date is: 06-May-21
Enter the new date: (dd-mm-yy)

E:\Computer  Languages\MS DOS>
```

1) To change directory (move one level up) → type 'cd..'

1) To change directory (move one level up) → type 'cd..'

1) To change directory (move one level up) → type 'cd..'

2) 'dir' means directory

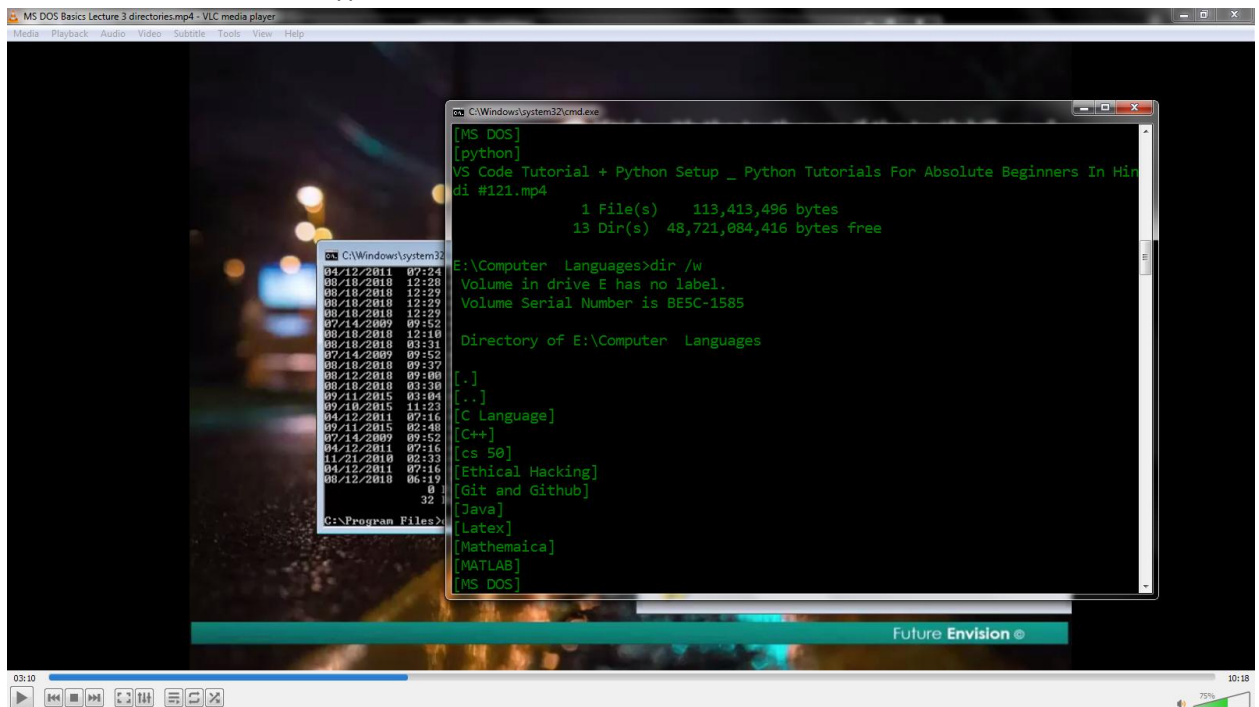

3) Type 'cd "file/folder_name" to go to that directory
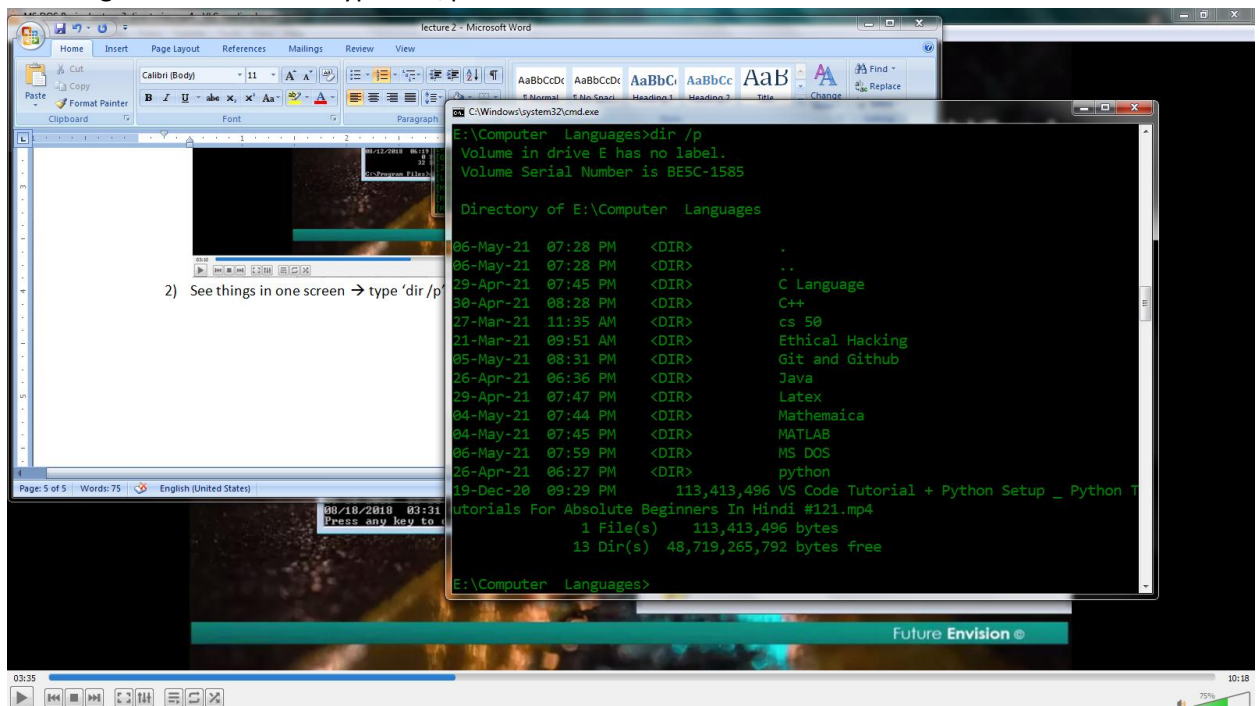

4) If we type 'dir' here it shows all the files in the current folder
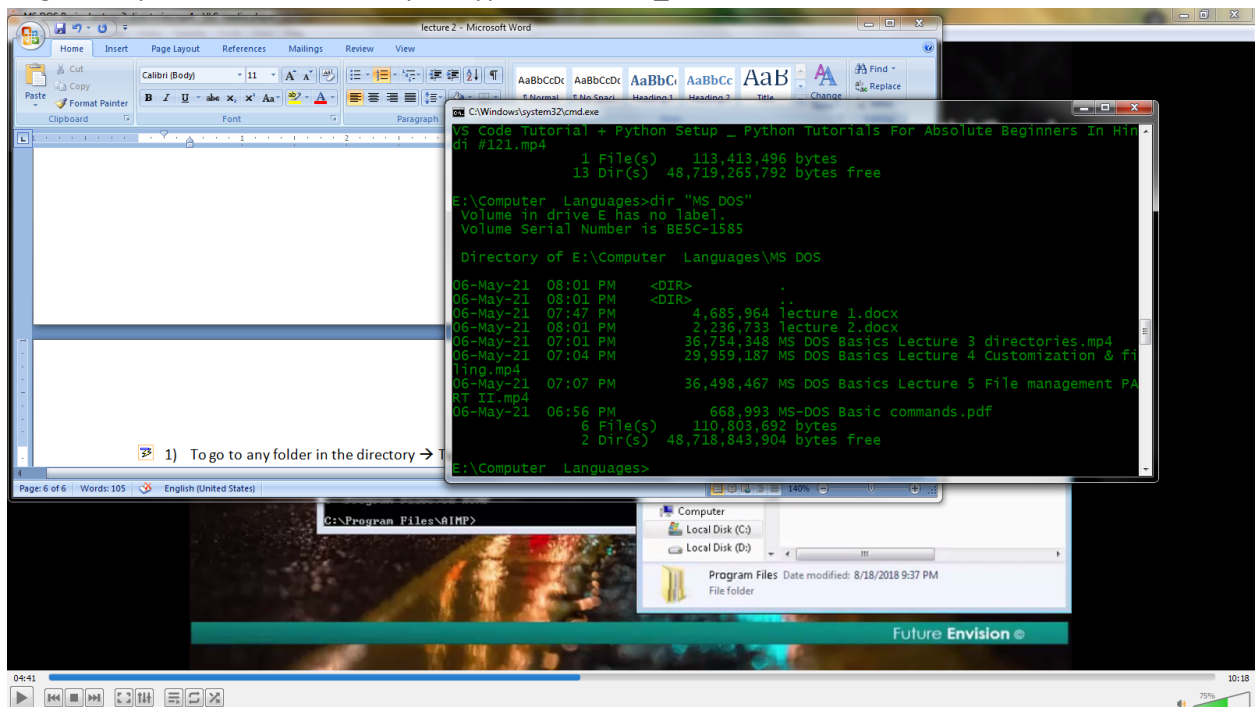

1) See files in wide format → type 'dir /w'

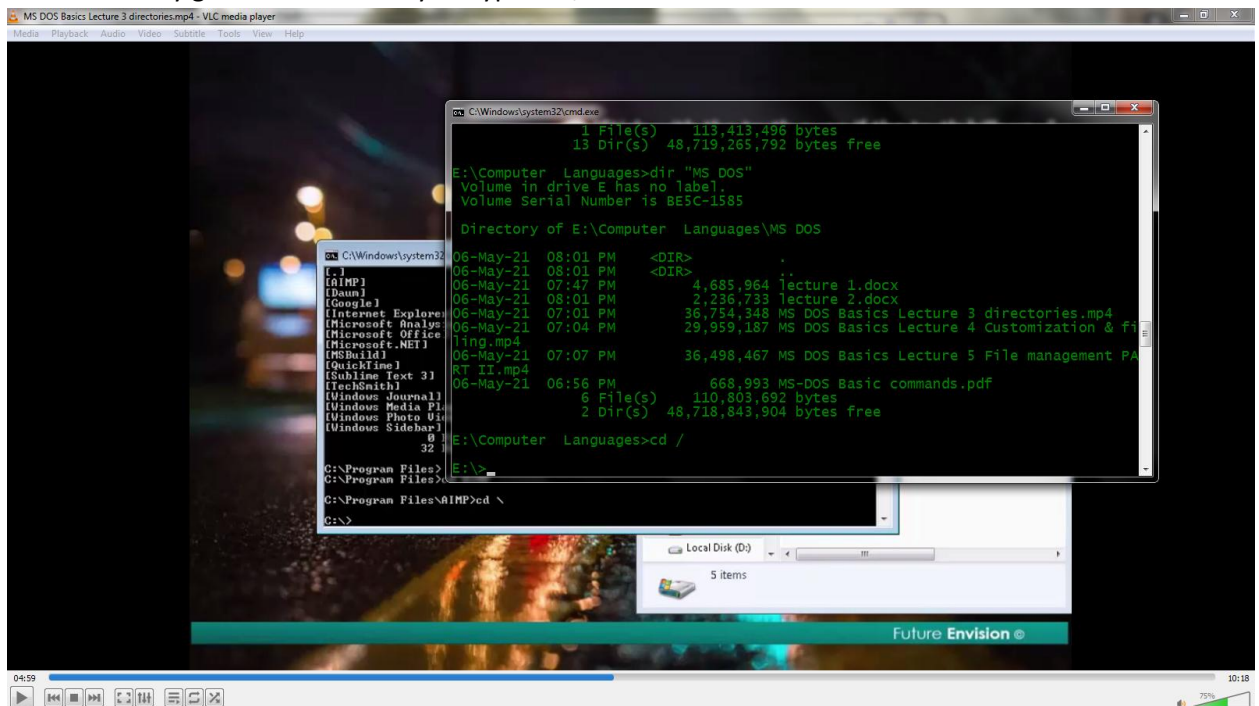

2) See things in one screen → type 'dir /p'

3) Type 'dir /w /p' to see it in wide format as well as in one page
